

**This patient always
had some residual
oedema—
until 'Edecrin' was
prescribed...**

**but 'Edecrin' is
a general
diuretic and
is not for residual
oedema only...**

'Dry weight' is achieved and maintained by adjustment of the simple dosage regime of this versatile diuretic.

'Edecrin' acts rapidly and predictably, hence diuresis may be timed to produce only minimal disturbance of the normal day or night.

EDECRI^{REGD}N

Ethacrynic acid

Supplied as 50 mg tablets. Detailed information is available to physicians on request.

SPENCER "FREE ACTION" SUPPORT BRIEF FOR MEN

Spencer's Revolutionary new concept of support in non-rubber, spandex elastic for back and abdomen.

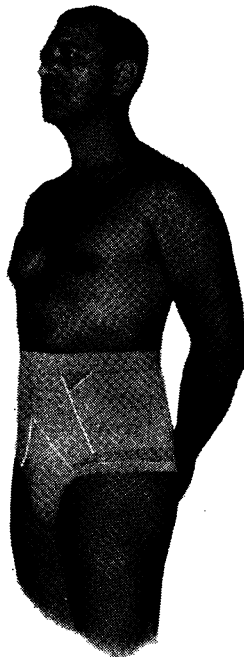

Subtle in design to the degree of being mistaken for tailored, body fitting underwear in the locker room, it actually provides powerful, functional support in elevating the viscera, thus relieving low back strain.

- * Front inner panels follow natural musculature
- * Soft, expansion areas at top edge and around legs allow motion and minimize bulging
- * Comfortable, accommodating crotch section has easy access opening

Patients have experienced relief from chronic low back pain while wearing the Support Brief

We recommend this Brief for minor low back conditions and where it is considered beneficial to raise abdominal contents in aiding respiration, relieving ptosis, minimizing pooling of blood in lower abdomen, etc.

For further information on the Spencer 'Free Action' Support Brief write to :

In chest infections

Ceporin

provides effective, safe
broad-spectrum activity

Cephaloridine . . . "is not inactivated by penicillinase and has a remarkably broad spectrum."

Practitioner, 1965, 195, 408

In serious infections of the respiratory tract, especially mixed infections, the unique activity of Ceporin can be used to particularly good advantage. The common infecting organisms in bronchitis and bronchopneumonia are highly sensitive to bactericidal action of Ceporin, including penicillinase-producing staphylococci. This is why Ceporin frequently gives dramatic clearance of infection, rendering the sputum sterile and providing rapid relief of symptoms. Ceporin can be safely used in patients hypersensitive to penicillin. In all patients and in all indications the injections are

remarkably painless and make the whole dose available to the body.

Other indications for Ceporin include urinary tract infections, meningitis, septicaemia, bacterial endocarditis and soft tissue infections.

Presentation

Vials: 1 and 5 x 250 mg

Vials: 1 and 5 x 500 mg

Vials: 1 and 5 x 1 gram

Ceporin is known in some countries as Ceporan. Ceporin and Ceporan are trade marks.

FAMILY PLANNING

A HANDBOOK FOR THE DOCTOR

Edited by MARY POLLOCK, M.B., Ch.B., M.R.C.O.G., Clinical Assistant, Gynaecological and Fertility Department, The Royal Free Hospital, with 15 contributors.

This book has been written for family planning advisers of all kinds, and particularly for doctors and others working in advisory clinics. The psychological aspects of family counselling are stressed, as are the problems of infertility and gynaecological matters including exfoliative cytology.

...and with A.V.C. where required

—that is the triumph of the
MACKIE
hearing aid

The new Mackie post-aural hearing aid is made in several different circuit versions so that the gain and frequency response can be selected to match the patient's needs; and it is available where required with a unique form of automatic volume control which has proved highly successful in cases of recruitment. The forward pick-up microphone gives maximum intelligibility of speech without background interference.
